

Opto Technica

Watch your staff productivity increase with Cyclope

IDENTIFY ABUSE AND IMPROVE PRODUCTIVITY

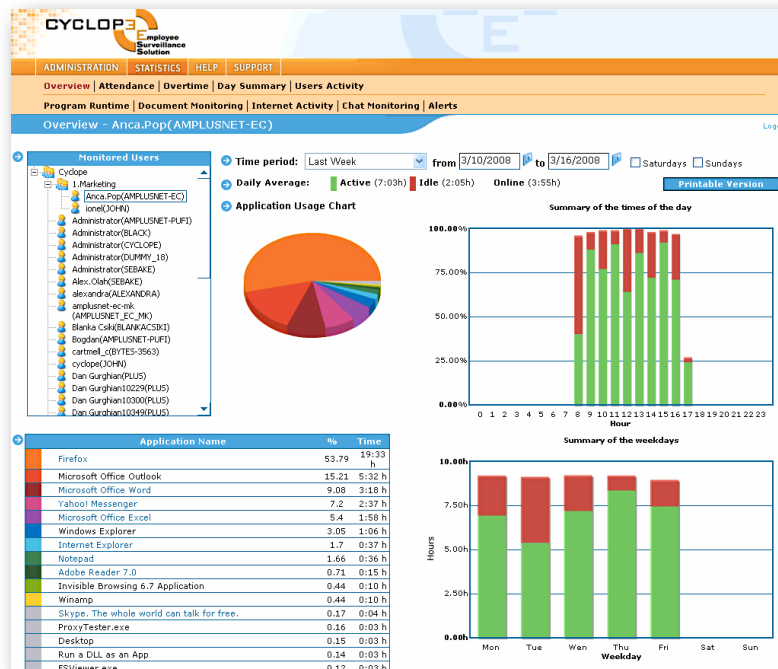

Constantly tracks application and internet usage, helping identify areas for improvement or potential abuse or malpractice. Organization can now have a degree of certainty in personal management and achieving required productivity goals.

STATISTICS AND REPORTING

Generate focused, detailed and comprehensive reports quickly and easily. Reports cover application usage, internet activity, staff attendance and overtime.

NON-INVASIVE

Without sacrificing privacy, find out how employees are using computers and the internet. Built-in alerts let management know if usage patterns affecting productivity are changing.

Opto Technica is a Value-Added distributor whose **mission** is to partner with global vendors from the US, Europe and Japan to bring unique IT solutions to small and medium sized enterprises across the Asia Pacific region.

Cyclope Employee Surveillance is an employee surveillance and network monitoring system developed by Cyclope-Series. It is specially designed from a management perspective to provide relevant information and statistics relating to the productivity of staff within their organization. The remarkable ease of use coupled with its superior functionality establish Cyclope as the market leading employee monitoring software solution.

With the help of Cyclope Employee Surveillance, management can now cohesively and comprehensively tackle productivity issues within their organization to heighten employee control and boost employee productivity.
